

Sponge UK Developer Test

Getting started

In order to run this test, you must either host this project on a web server or enable local file execution in your browser.

NodeJS server (preferred)

1. `npm i`
2. `npm start`
3. [Open the test in your browser](#)

Local web server

- [WAMP](#) - Windows, Apache, MySQL, PHP
- [MAMP](#) - Mac, Apache, MySQL, PHP
- [Fenix](#)
- [LightTPD](#)

Chrome with local file support

If you aren't able to install or run a web server, you can open the files directly in Chrome. To do this, you must [enable the requests with the protocol of `file://`](#).

Tools required

- An IDE of your choice (e.g. [Sublime Text](#))
- A web browser (e.g. [Chrome](#))
- A copy of Microsoft Word (for opening the example text - you may be able to use [Google Docs](#) instead)
